HARD

*All the tyres of the MICHELIN StarCross 6 range are reversible for a second life**

** Except Sand rear*

Identification of the tyres thanks to the tread pattern

*Recommended pressure: 0.9 bar / 13 psi
Minimum pressure: 0.8 bar / 11.6 psi*

Michelin starcross 6

. Tread blocks « bucket shaped » for better traction

. Double ply carcass (2 layers crossed at 90°)

. Protection rubber

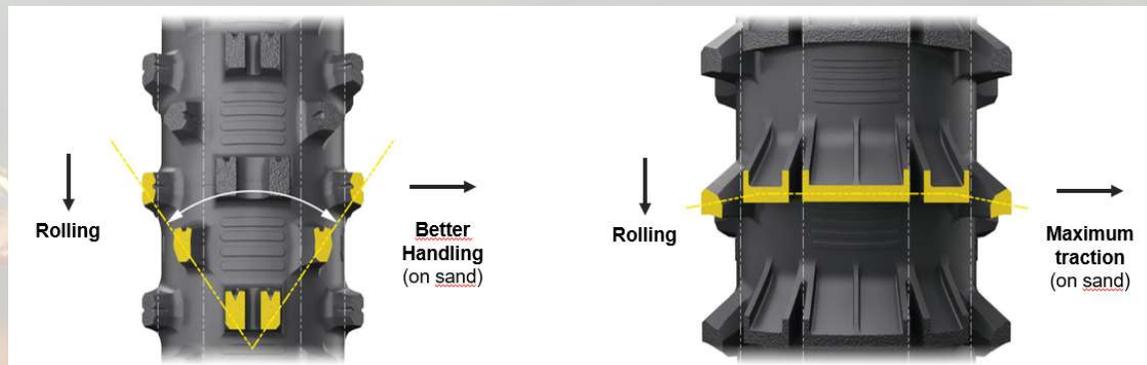

. Reinforced rubber

MICHELIN STARCROSS 6 SAND

The sc6 sand front tyre was developed to increase floatability in deep sand and improve ability to dig into the soft ground

The sc6 sand rear tyre was developed to give maximum traction in deep sand
